

Good morning,

Our colleagues at the Virginia Small Business Development Center Network, the SBA's lead local and state partners for CARES Act and related supports, have developed the Business Recovery webpage to help entrepreneurs carefully plan for and execute new strategies in light of the state and national COVID-19 phased reopening.

These guides cover a broad range of critical considerations, and ideally, business-owners will be use them in collaboration with the expert business consultants at the local SBDC who can provide free counseling.

Please feel free to share the Business Recovery resources with businesses in your community that are preparing to safely reopen in the coming weeks and months.
